Maintenance Visit Plan Preventive Maintenance

Production delay due to equipment malfunction is often caused by a lack of maintenance. Plan your next maintenance visit to keep up your production.

An annual HGG maintenance visit reduces deterioration, upholds equipment value and extends the machine lifetime.

- 1 Maximize equipment uptime
- 2 Extend machine lifecycle
- 3 Increase productivity

> Pre-Visit Diagnostic Call
Our service already starts prior to the actual visit. Via a phone call we diagnose and discuss with you the scope of the visit.

> Wear Parts Inspection On-Site
Equipped with a comprehensive maintenance checklist, our engineer checks all wear parts, and spots issues before potential breakdowns happen.

> Replace Parts (Optional)
Based on inspection HGG can replace parts to prevent downtime and increase cutting quality.

> Thorough Greasing On-Site
During the visit, your machine is also greased carefully. Practice teaches that machines benefit from regularly executed grease schedules.

> Precise Calibration On-Site
Our engineer calibrates your machine with precision to ensure alignment, accuracy, and superior cutting quality.

> Software Update
Software updates can improve production efficiency dependent on your machine and status. HGG can show you the options.
