

Specialists in 3D profiling

ProCAM training

Workpreparation training

Why is workpreparation training important?

- Why is work preparation training important?
- > Digitalize your process further to keep it up-to-date and efficient resulting in reduced reprogramming or extra measurement.
- > Mistakes on the drawing table are reduced significantly. You will learn how to check your parts before they are released for production.
- > Maximize and get the most out of your machine by modelling parts toward their capacity.
- > Improve your digital process and get the most out of your latest CAD connection as each year you pay for your CAD software, functionality is also added.
- > Efficient material usage is also achieved by learning good practices with Nesting.

1 Save time and cost with smart work prep

2 Reduce errors significantly

3 Master complex shapes

You will learn how to:

- > Program cutting files
- > Import and change CAD files
- > Model for thermal cutting
- > Model to maximize machine capabilities
- > Maximize the use of the material
- > Set up ProCAM database

At HGG HQ

- > Train 2 days and Visit Experience center

Online training

- > Beginner 4 hours
- > Intermediate 4 hours
- > Advanced 4 hours

A must for:

- > Production Engineers
- > Steel Detailers
- > CNC Programmers
- > Facility Managers
